

Milt McIver – Candidate for Mayor of Northern Bruce Peninsula

BIO: Our family still lives on the farm settled by my ancestors in the mid-1800's. My deep roots inspired my involvement in municipal government. It has been my privilege to serve as Mayor since amalgamation in 1999. The experience gained from various committees gives me an understanding of the “big picture” for our Community.

ISSUES AND PLATFORM:

Council will face many challenges in the upcoming term and I would appreciate the opportunity to continue being a strong advocate for the Municipality.

- Managing the popularity of our area will continue to be foremost in the minds of the ratepayers. The Municipality has many plans for increased parking facilities and improved infrastructure in the works and I will continue working to see these items to completion.**
- The safety of Highway 6 and our local roads is a top priority for residents and visitors. Many initiatives have been implemented and more needs to happen.**
- Our Municipality must continue to support our local schools and keeping quality health care close to home. Other initiatives to foster economic development include continual infrastructure advancements and Broadband access. I will continue to support expanded economic opportunities for a sustainable future.**
- There are rules and regulations in all Municipalities and there must be for the comfort and enjoyment of the citizens. Some are provided by other levels of government and some are developed locally. I encourage people to participate in the process for public input and I always listen to all sides of the issues. It is my desire that the Zoning Bylaw be resolved in a fair and responsible manner. My leadership style will continue to foster unity and representation of the entire Municipality.**

- **Many ratepayers have expressed concern over short-term rentals and that issue will need to be reviewed in the next term.**

If re-elected, I will continue to practice an open and democratic process at Council meetings. Transparency, Accountability and Honesty are the foundation for good governance and I strongly believe in fairness for all. The Municipality is in good financial shape and I will continue to support prudent spending of the taxpayer's money. One other item that I feel is important is to represent our Community in a fashion that is reasonable and respectful so that we can all be proud of our home.

I have no self-interest or agenda, other than to continue to work hard for a strong and viable community. I want for all ratepayers what I want for my family: a healthy, prosperous community that values our natural assets and provides a high quality of life.

Thank you for this opportunity and I would appreciate your support.
